PRESS RELEASE

CARDINAL COMPONENTS, INC., INTRODUCES THE CPW SERIES OF FACTORY PROGRAMMABLES

Wayne, NJ —January 7, 2013—Cardinal Components, Inc., a world leader in the manufacture of programmable oscillators, is introducing the CPW of programmable oscillators. It has a temperature range (-40 to +85 C) in frequencies from 1 MHz to 133 MHz. Package offering include the 5mm x 7mm and 5mm x 3.2mm hermetically sealed ceramic surface mount product. The product is offered in 3.3 v, 2.5 and 1.8 v with CMOS, TTL options. The CPW series includes a power-down option for the green compliancy of today's product demands.

The product is ideal for the Avionics, COTS Military, Homeland Security, Industrial, and other temperature-intensive applications.

Samples of the new CPW device can be obtained by contacting Cardinal or one of its authorized distributors worldwide. Sample quantity pricing is in the \$ 2.00 range, and 10k piece volume pricing is \$1.15 each.

The Cardinal difference is more than just our range of products or our technical capabilities. Steadfast, reliable performance that you can trust is what sets our company apart.
